SUMMARY

Third-year Computer Science student with practical web development experience using HTML, CSS, and JavaScript. Strong foundation in programming fundamentals, including Java, C++, object-oriented programming, and data structures and algorithms. Experienced in building responsive, user-friendly web interfaces and collaborating on team projects using Git and GitHub. Seeking a Junior Web Developer role where I can apply my technical skills, contribute to real-world projects, and continue growing as a software developer.

EDUCATION

Bachelor of Science in Computer Science

Arba Minch University

Expected Graduation: 2028 | GPA: 3.61/4.00

09/2024 – Present
Arba Minch, Ethiopia

SKILLS

Web Development

HTML, CSS, JavaScript, Responsive Design

Programming

Java, C++

Tools

Git, Github

Computer Science

Object-Oriented Programming, Data Structures & Algorithms

Databases

SQL, MySQL

PROJECTS

Weather App

Technologies: HTML, CSS, JavaScript, OpenWeatherMap API

- Built a responsive weather application that allows users to search for cities and select the correct location using country codes.
- Integrated the OpenWeatherMap API to retrieve and display real-time weather information, including temperature, humidity, and weather conditions.
- Designed an interactive, user-friendly interface for presenting location-based weather data.

Expense Tracker

Technologies: HTML, CSS, JavaScript, Local Storage

- Built a responsive expense tracking application with functionality to add, edit, and delete income and expense transactions.
- Implemented automatic calculation of total income, expenses, and current balance to support personal budget management.
- Used browser local storage to persist transaction data across sessions.

TO-DO List

Technologies: HTML, CSS, JavaScript, Local Storage

- Developed a task management application with features to add, edit, delete, and mark tasks as completed.
- Implemented task filtering and search functionality to help users organize and find tasks efficiently.
- Used browser local storage to persist tasks and maintain user data between sessions.
